

Portrait Light Guard

Light guard is designed to block incoming light that escapes off the sides of the window opening and to provide insulating protection at the margins. The innovative light block achieves maximum window coverage from edge to edge.

Aluminium Light Guard is available as an option for **internally fitted** Corded, Corded TDBU, Corded Day & Night, SmartRise Cordless, Cordless TDBU, Corded Day & Night, Cord Loop, Cord Loop TD, Cord Loop Day & Night, Motorised and SmartFit Honeycomb Shades.

Light Guard is available for inside mount applications only and should be positioned to fit flush with the top of the headrail and the bottom of the opening. The Aluminium Light Guard will be supplied at the same length as the opening height and can be easily cut to a smaller length if required. Light Guard is attached using screws.

Aluminium Light Guards can be supplied one of two ways:

1. 1 pair – used either on front of the blind **OR** behind the blind (1 piece is L shaped)
2. 2 pairs – for placing in front **AND** behind the blind (2 pieces form a U shape)

Colours Available are: White, Cottage White, Sahara, Silver, Chocolate, Black Ink
